

Closed-type metal wall-mounted fire rack

Product code: 1819101100

A closed-type metal wall-mounted fire rack is designed to store various elements of fire prevention and safety.

Wall-mounted fire rack is a closed type fireproof metal fire rack of red color with doors, which is usually mounted to the wall in a specifically designated place. It can be additionally equipped with a lock on the doors to avoid theft.

Fire rack kit usually includes: a salvage hook, a crowbar, a fire axe, a shovel, two cone buckets, two fire extinguishers.

Properly positioned and well-equipped fire rack is the foundation of your safety!
