

Open-type metal wall-mounted fire rack

Product code: 1819102100

An open-type metal wall-mounted fire rack is designed for storage of hand tools and primary fire extinguishing equipment.

Wall-mounted fire rack is a light red metal frame with tool mounts, which is attached to the wall with self-tapping screws or spiral nails. This kind of fire rack should be placed in an open view in buildings or in open areas and provide means of free evacuation of people or the operation of equipment.

The delivery set usually includes: a crowbar, a salvage hook, a round-pointed shovel, a fire axe, two cone buckets, fire extinguishers if agreed.

Properly positioned and well-equipped fire rack is the foundation of your safety!
