

Closed-type fire-fighting equipment stand

Product code: 1820102100

A closed-type fire equipment stand is utilized to store firefighting gear. It comprises of a red fire rack with front doors and a sandpit with a hinged cover. This stand is set up at facilities that lack external/internal fire water lines, automatic firefighting systems, or are located more than a hundred meters away from water sources.

The kit typically contains a crowbar, a salvage hook, a hook, a round-pointed shovel, two cone buckets, and a sandbox.

Ensuring the fire equipment stand is positioned correctly and equipped with the necessary tools is fundamental to maintaining safety.
