

## Tipping sand box

The tipping sand box allows you to pour out the sand quickly and start extinguishing a fire. The tipping sand box can have different internal volumes. It is painted red for better visibility and is made of steel sheet with a polymer powder coating to protect against corrosion.

The sand box is used with fire racks or stands with fire-fighting equipment, for greater efficiency.

The sand is effective in extinguishing oil products and other flammable liquids. It is excellent for extinguishing fires in places remote from water sources or when there are no automatic fire extinguishing systems (factories, warehouses, parking lots, workshops, etc.).

**Product code: 1818102100**

## Specifications:

- Material - steel sheet 1.5/2 mm;
- Color - red;
- Internal volume of the box - 0,1 m<sup>3</sup>; 0,13 m<sup>3</sup>; 0,2 m<sup>3</sup>; 0,25 m<sup>3</sup>;
- Overall dimensions - 400x800x400 mm; 600x800x500 mm; 600x1000x500 mm;
- Weight - 22-34 kg;
